

DNA LEARNING CENTER

SCIENCE
CAMPS

Cold Spring Harbor Laboratory's DNA Learning Center (DNALC) is the world's first science center devoted entirely to genetics education. Over 32,000 students have participated in our camps. Guided by experienced instructors, students entering 6th–12th grades use sophisticated laboratory and computer equipment to perform experiments several grade levels ahead of their peers.

Fun with DNA

(entering grades 6–7)

Build an understanding of cell biology, genetics, microbiology, and biotechnology through microscopy, modeling, and lab investigations.

WiSE Fun with DNA

(entering grades 6–7; only in CSH)

In addition to standard *Fun with DNA* labs, meet Cold Spring Harbor Laboratory scientists to learn about research at CSHL and participate in special Women in Science & Engineering activities.

World of Enzymes

(entering grade 8, or *Fun with DNA* alumni entering grade 7)

Explore the use of enzymes in molecular biology and the food and health industries.

Green Genes

(entering grade 9, or *World of Enzymes* alumni entering grade 8)

Perform the same recombinant DNA techniques used to manufacture human proteins such as insulin.

Forensic Detectives

(entering grades 9–10)

CSI enthusiast?

Experience forensics through a series of labs and activities in a more realistic fashion than portrayed on TV—it's not just DNA!

Forensic Crime Lab

(Entering grade 10 or Forensic Detectives alum entering grades 9; in CSH & Sleepy Hollow)

In this follow-up to *Forensic Detectives*, take a deep dive into the biological and chemical tools used to evaluate collected evidence.

DNA Science

(entering grades 10–12)

Perform experiments in molecular biology, culminating in the construction and cloning of recombinant DNA. Based on our *DNA Science* textbook.

DNA Barcoding

(entering grades 10–12; in CSH, NYC, Sleepy Hollow)

Use molecular biology and bioinformatics techniques to obtain DNA barcodes, identify species and explore evolutionary relationships.

Synthetic Bio NEW

(DNA Science alumni, or completed AP Biology, entering grades 10–12; only in NYC)

Blend biology, engineering, and computer science to design and build new biological systems.

BioCoding

(DNA Science alumni or comparable experience entering grades 11–12; in CSH & NYC)

Get started in computer programming and bioinformatics, a growing field in managing and analyzing biological data. No coding experience required!

Genome Science

(DNA Science alumni, or completed AP Biology, entering grades 11–12; in CSH, NYC, Sleepy Hollow)

Use Nobel Prize-winning biochemical methods and bioinformatics tools to analyze the genetic components of living things.

Sequence a Genome!

(DNA Science plus one other advanced DNALC camp, entering grades 11–12; in CSH & NYC)

Use bioinformatics and data science to assemble genome sequences and explore what DNA reveals about humans and other living things.

STARS Program

(Entering grades 10–12; in CSH & NYC)

Science Technology & Research Scholars (STARS) is a 2-week research experience that supports the next generation of meritorious scientists, doctors, and other health professionals.
